

DELTA® TRANSFER BATHTUB

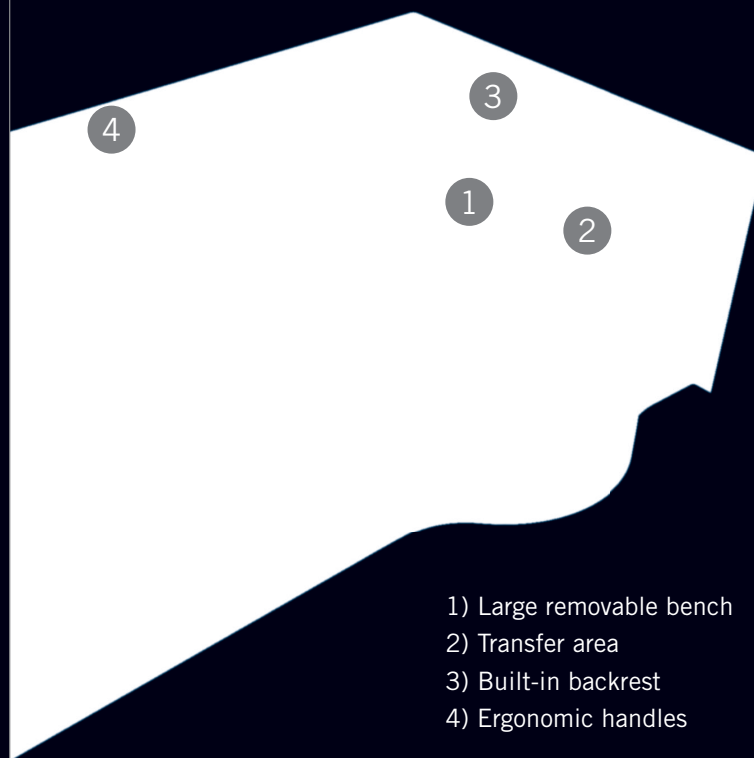

ACCESSIBLE AND STYLISH BATHING FOR THE HOME.

Adding to our line of new shower systems, Delta® introduces a 60" transfer bathtub, bringing additional bathing options to your clients. This bathtub, constructed of durable acrylic, is built to last.

The transfer area allows for easy transition onto the bench from either a wheelchair or a seated position. The area can also be used conveniently by caregivers. The bench, sized precisely for bather comfort and confidence, offers complete flexibility. Flip up when not in use, or remove completely. Under the bench, the bathtub contour has a built-in backrest for comfortable bathing. Ergonomic handles on either side of the bathtub—available in either Polished Chrome or Brushed Stainless finishes—are positioned for maximum assistance when entering or exiting the bathtub.

This 60" x 32" transfer bathtub is the ideal size for retrofit or new construction. You can customize and upgrade the look of the bath by using the tile of your choice.

Accessible bathing systems don't have to look institutional. For today's homeowner, Delta provides safety in the bath—without sacrificing style.

- 1) Large removable bench
- 2) Transfer area
- 3) Built-in backrest
- 4) Ergonomic handles
